

Woven Christmas Heart

Fold a sheet of red paper and a sheet of white paper in half. Lay the template with its straight edge on the fold and cut it out — one red, one white. Cut along the two lines too, starting at the fold. (Ask a grown-up to help with the scissors.)

1. Lay the two shapes like a letter **V**, with the round ends pointing up and out.
2. Weave: the first red strip goes **through** the first white strip, **around** the next, **through** the last. The next red strip does the opposite: **around, through, around**.
3. Push the strips gently together until it looks like a checkered heart.
4. Glue on the paper handle and hang your heart on the tree. It opens like a little basket!
